Healing Blossom

REINSPIRED HEALTH RETREAT (KOH SAMUI)

Run by experienced medical professionals, the retreat takes place in the beautifully private beachside confines of Miskawaan Villas and Health Clinic on the tropical paradise of Koh Samui, where our empathetic approach to physical and mental wellbeing focuses on the whole body. The journey to optimum health begins with a series of diagnostic laboratory tests leading to meaningful private consultations with our doctors so as to really understand your personal health issues and wellness goals. Based on this deep-dive into your medical history, physical condition and lab results, the doctors will recommend treatments such as Ozone Therapy and Lymphatic Drainage Massage. Ozone Therapy is a gentle way of increasing oxygenated blood in tissues throughout the body, which reduces inflammation, speeds up healing, sharpens brain function and boosts energy to leave you feeling full of vigour. Lymphatic Drainage Massage helps to move lymph fluids around the body, which encourages the removal of waste and toxins from tissues. The treatments work in tandem to strengthen the efficiency of the immune system in the long term, as does Miskawaan's selection of bio-identical to nature proprietary IV infusions and supplements, which will be tailored to an individual's specific health needs.
